

Professional Summary

Software Engineer Intern with hands-on experience developing backend systems using Java and Spring Boot, including REST APIs, database integrations, log processing, and enterprise application troubleshooting. Strong foundation in object-oriented programming, data structures and algorithms, relational databases, web technologies, and software development practices. Built production-facing backend and automation solutions alongside independent AI and computer vision projects, combining strong engineering fundamentals with the ability to learn and work across technologies.

Experience

Checkpoint Systems <i>Software Engineer Intern</i>	Jan 2026 – Present Bengaluru
- Engineered an in-house log analysis platform using Java, Spring Boot, REST APIs, and OpenSearch to provide centralized log search and analysis for QA and pre-production environments, reducing reliance on Datadog and associated observability costs. - Built log search and troubleshooting workflows for L2/L3 support teams, reducing manual log tracing and enabling faster investigation of application issues across non-production environments. - Automated 700+ of 3,000+ manual regression test cases (23% of the suite) using Playwright, expanding automated coverage of enterprise inventory management workflows and reducing repetitive manual testing effort.	

Projects

Recall — Personalized Knowledge & Memory Platform <i>Java, Spring Boot, React, TypeScript, PostgreSQL, pgvector, RabbitMQ</i>	
- Built a personalized knowledge platform with a Chrome extension for saving webpages, selected content, and notes, enabling users to retrieve previously saved information through semantic and keyword-based search. - Designed an asynchronous processing pipeline using RabbitMQ and Spring Boot workers to extract, summarize, embed, and relate saved content without blocking user-facing requests. - Implemented hybrid retrieval using PostgreSQL full-text search and pgvector semantic search, combining relevance with user context and interaction signals for personalized ranking	
VisionOps — Multi-Agent Business Intelligence Platform <i>Python, FastAPI, CrewAI, Gemini API</i>	
- Built a multi-agent AI platform that orchestrates specialized agents to analyze business data, generate insights, and synthesize results from natural-language queries. - Developed FastAPI services for request handling and agent orchestration, separating API, reasoning, and data-processing responsibilities. - Implemented structured multi-agent workflows for automated data analysis, insight generation, and response synthesis.	
Student Information & Course Management System (Backend) <i>Java, Spring Boot, REST APIs, MySQL, JPA/Hibernate</i>	
- Developed a Spring Boot backend for managing students, departments, colleges, courses, and authentication through modular REST APIs. - Designed and implemented RESTful APIs for CRUD operations, user registration, login, and relational data handling using JPA/Hibernate and MySQL. - Structured the backend using controller, service, and repository layers to separate API handling, business logic, and data-access responsibilities.	

Technical Skills

Programming Languages: Java, Python, JavaScript, SQL
Backend & Frameworks: Spring Boot, REST APIs, JDBC
Software Engineering: Object-Oriented Programming, Data Structures & Algorithms, MVC Architecture
AI & Machine Learning: Machine Learning, Multi-Agent AI, YOLOv5, Computer Vision
Web Technologies: HTML, CSS, React, Typescript
Databases: MySQL, MongoDB, OpenSearch
Developer Tools: Git, GitHub, Azure (foundational knowledge), Playwright, Postman, Docker

Education

RNS Institute of Technology <i>B.E. (CSE), CGPA: 9.44</i>	2022 – 2026
Surana Independent PU College <i>XII (PUC), Percentage: 96.5%</i>	2022
St. Sophia Convent High School <i>X CBSE (10th), Percentage: 91.6%</i>	2020

Achievements

- S.U.I.T.S Hackathon:** Achieved 1st place in a departmental DSA hackathon, organized by Adroit and the CSE department.
- Certificate of Merit:** Recognized for outstanding academic achievement by securing the 3rd highest SGPA among over 200 branch students.
- Recognized as Runner-Up (out of **151** teams) at YESIST12 IEEE Open Project Expo 2025.
